

Absolutely. Based on everything you've shared about the team and project, **your role is much broader than AI Architect**. You are acting as the **Founder, CEO, Product Manager, Project Lead, Business Strategist, and AI Product Visionary**.

Below is a practical **16-day execution plan** in table format.

HormoneBench AI – 16-Day Hackathon Execution Plan

Day	Tayyab Nisar (Founder, CEO & Product Lead)	Full Stack Developer	AI Developer 1 (Gemini & Research AI)	AI Developer 2 (Data & ML Engineer)	Researcher 1 (Biomedical Research)	Researcher 2 (Education & Awareness)	Business/FinTech Expert
1	Finalize PRD, roadmap, GitHub, assign tasks, define MVP	Setup Next.js, Tailwind, shadcn/ui	Setup Gemini API, backend structure	Design CSV upload architecture	Collect research papers & datasets	Outline learning modules	Market research, competitors
2	Review UI flow, finalize user journeys	Build Landing Page	Create prompt templates	Build multi-file upload backend	Validate datasets	Plan awareness topics	TAM, SAM, SOM
3	Review architecture & APIs	Dashboard layout	Literature search integration	Dataset preview & parsing	Hormone glossary	Student learning roadmap	Business Model Canvas
4	Product review meeting	Authentication & navigation	Research Copilot backend	Schema detection & column mapping	Clinical references	Patient content draft	Revenue model

5	Sprint review & issue tracking	Upload interface	Gemini dataset summarizer	Missing value detection	Validate AI outputs	Myth vs Fact content	Pricing strategy
6	Prepare feature demos	Research Hub UI	Paper summarization	Data quality scoring	Clinical review	Student Academy content	GTM draft
7	Review integrations	Awareness Center UI	Student AI Tutor	Dataset merge engine	Evidence review	Awareness articles	Partnership opportunities
8	Judge experience review	Charts & analytics	Report Generator	Explainability module	Fact checking	Interactive quizzes	Financial projections
9	Finalize product messaging	Resource Library UI	Citation generator	Benchmark generator	Review benchmark metrics	Resource collection	Competitive positioning
10	Integration planning	Connect frontend to backend	Integrate AI APIs	Connect dataset engine	Verify medical responses	Verify educational content	Investor narrative
11	UI feedback & improvements	Responsive design & animations	Optimize prompts	Optimize preprocessing	Final literature review	Accessibility review	Sustainability strategy
12	Internal testing coordination	Bug fixing	AI testing	Dataset testing	Scientific review	Educational review	Risk assessment
13	Demo planning, presentation flow	Final UI polish	AI output optimization	Performance optimization	Final validation	Proofreading	Business presentation
14	Devpost content,	Deployment	Documentation	Documentation	References & citations	Learning resources	Financial summary

	document ation	preparatio n					
15	Record demo, rehearse pitch	Deploy production build	End-to-end AI testing	End-to-end testing	Final scientific approval	Final awarene ss review	Final GTM
16	Submit Devpost, pitch video, presentati on	Productio n verificatio n	Gemini verification	Dataset verification	Medical accuracy sign-off	Educatio nal sign-off	Business & impact review

Role Responsibilities

Team Member	Primary Role	Main Deliverables
Tayyab Nisar	Founder, CEO, Product Lead & Business Strategy	Product vision, roadmap, feature prioritization, team coordination, documentation, pitch deck, demo, Devpost submission, stakeholder communication, final approvals
Full Stack Developer	Frontend & Backend Development	Next.js application, dashboard, authentication, responsive UI, API integration, deployment
AI Developer 1	Gemini AI & Research Intelligence	Research Copilot, literature analysis, RAG, AI chat, report generation, prompt engineering
AI Developer 2	Data Engineering & Machine Learning	Multi-file upload, preprocessing, dataset validation, schema matching, benchmarking, explainability
Researcher 1	Biomedical & Clinical Research	Scientific validation, datasets, hormone references, clinical accuracy, evidence verification

Researcher 2	Education & Public Awareness	Student Academy, patient education, blogs, FAQs, awareness campaigns, learning resources
Business/FinTech Expert	Business Strategy & Commercialization	Business model, GTM strategy, financial projections, partnerships, investor readiness, impact metrics

Daily Deliverable Expectations

Role	Daily Target
Tayyab	Plan, review, unblock team members, manage product scope, update documentation, prepare presentations, ensure integration between workstreams.
Full Stack Developer	Complete one UI module or backend integration every day and push tested code to the repository.
AI Developer 1	Deliver one working AI capability or improve an existing Gemini-powered feature daily.
AI Developer 2	Build and validate one data processing or ML component each day, ensuring reliable dataset handling.
Researcher 1	Review and validate medical content, datasets, and AI outputs with supporting scientific evidence.
Researcher 2	Produce or refine educational content, awareness materials, FAQs, and learning resources each day.
Business/FinTech Expert	Advance one business deliverable daily, such as market research, pricing, partnerships, or investor materials.

This structure keeps responsibilities focused, avoids overlap, and ensures that by Day 16 you have a polished submission with a strong technical demonstration, credible research foundation, educational value, and a compelling business narrative.
