

HormoneBench AI – Project Summary

One-Line Summary

HormoneBench AI is an AI-powered open research ecosystem that accelerates women's hormonal health research through standardized datasets, intelligent AI agents, explainable models, and evidence-based education.

Vision

To become the world's leading AI-powered ecosystem for advancing women's hormonal health through research, education, innovation, and collaboration.

Mission

Empower researchers, healthcare professionals, students, and the public with trustworthy AI tools and standardized research infrastructure.

USP

A unified platform combining AI research agents, standardized datasets, explainable AI, benchmarking, reproducible research, and public education.

Target Users

Researchers, healthcare professionals, students, universities, and the public.

Core Modules

Research Hub, AI Research Agent, Student Academy, Patient Awareness Center, Healthcare Professional Portal.

Key Features

Multi-file upload, AI dataset validation, schema matching, Research Copilot, literature summarization, explainable AI, benchmark leaderboards, report generation, educational AI tutor.

Technology

Next.js, Tailwind CSS, FastAPI, Python, Google Gemini, RAG, Explainable AI, Knowledge Graphs.

Innovation

A single ecosystem connecting research, education, and awareness for women's hormonal health.

Impact

Improves research reproducibility, accelerates innovation, and promotes evidence-based education.

SDGs

SDG 3, SDG 4, SDG 5, SDG 9, SDG 17.

Current Stage

Research Prototype | TRL 4 | MVP under development.

Tagline

Building the AI Foundation for Women's Hormonal Health.
